

Nortek Global HVAC UK COVID-19 Statement

2nd April 2020

Continuing to support our employees and customers

The health and safety of our employees and customers is at the forefront of everything we do. As we learn about and assess the COVID-19 situation, we remain committed to business continuity.

At Reznor we have moved quickly and adapted our business to maintain a safe working environment for our employees while continuing to trade normally.

Our leadership team complete daily health checks, ensuring that we are adopting the latest government advice.

Employees that can work from home are working remotely utilising technology to continue to support the business and our customers.

We continue to manufacture as planned to meet existing and new requirements.

We will endeavour to continue to provide customer support and quality equipment that our customers need, while mitigating any risks to the health and well-being of our customers and employees.

As we weather this storm, we will continue working together so that we can emerge stronger and continue our mission of creating a better tomorrow, every day.

Stay At Home. Stay safe.
